

Advanced Project Manager Training Program for International Project Managers

A training program for managers who are or will be involved in management of complex and challenging projects.

Objectives of the training program

- to broaden project managers' professional skills
- to study European companies' project management experience, especially in the industry that the customer company represents
- to prepare participants for more challenging projects
- to further develop customer's project culture
- to develop leadership and behavioral competences needed in large and international projects (also in multicultural context)

Target group

Project managers, who

- have a genuine desire to work and develop as project manager or to be responsible of project management contracting
- already have the basic knowledge in Project Management
- are interested to increase their ability to manage larger/more complex projects and international projects
- are interested to develop their leadership capability and teamwork facilitation skills

Training methods

Case based In-class training

- interactive and discussion-oriented lectures by experts
- collaborative learning techniques, team work, pair work etc.

Peili™ Behavioral profile

- Peili coaching tools will be used to develop leadership and communication skills
- Peili Behavioral Profile will describe the strengths in one's behaving

Case project introductions of global companies.

Course materials

Structured binders in English containing educational material for each training module

The program also offers

- trainers who are experts in their field
- a program coordinator and /or Chinese speaking interpreter, who attends all training sessions acting as a communicator between participants and trainers when needed
